-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Withdrawal of Indication of Allowability

The indication of allowability of claims 34-39 is withdrawn in view of the rejection made below.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 34-39 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims do not recite an invention that produces a useful, concrete, and tangible result. Claims 35, 36, 38, and 39 merely recite an algorithm for calculating a constant. Claims 34 and 37 only recite an equation for calculating volume, lacking a recitation of its accomplishment of a practical application. See MPEP 2106.

Allowable Subject Matter

Claims 1-33 and 40 are allowed.

Reasons For Allowance

Claims 1-33 and 40 are allowed because the recited combination of steps or elements of a method and apparatus for determining the volume of a patient's peritoneal cavity using bioimpedance with measuring electrodes in place on a patient and a method and apparatus for controlling continuous dialysis fluid flow through a patient's peritoneal cavity using volume determined by bioimpedance measurements directed at the peritoneal cavity is not found nor

fairly taught in the prior art of record, as argued by applicant and agreed to by examiner. In claim 28 controlling the means for continuously flowing fluid based on volume determined by bioimpedance measurement directed at the peritoneal cavity where the bioimpedance measurement directed at the peritoneal cavity is accomplished by the second means for determining volume is not found in the prior art of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Hayes at (571) 272-4959. The examiner can usually be reached Monday -Thursday, 7:00-4:30, and on alternate Fridays.
